

## Public Enemy Lyrics

### "Exit Your Mind"

Greatness awaits us in hell for centuries  
Still able to pull good out of nothing  
And every time we go there  
The world witness our creative genius  
The arts and science  
The gods and culture  
Unlimited progress for the original people  
We brought civilization to the world  
The fathers and mothers of it all  
America would not have no flavor if it wasn't for the black population  
Come on black people, it's our time  
The great musicians we brought  
Science and mathematics to the world  
Stop copying  
We're the original people  
It was the mathematical genius of three black women  
Who put the man on the moon  
From the traffic light, down to heart surgery  
Experience life from the creator of life  
There is no way around it  
We are the people of God  
Exit your mind, enter the thinking of God
